FIRST MIDWEST FINANCIAL, INC.  
AND SUBSIDIARIES  
Notes to consolidated Financial Statements

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accounting policies followed by First Midwest Financial, Inc. ("First Midwest" or the "Company") and its consolidated subsidiaries, First Federal Savings Bank of the Midwest ("First Federal" or the "Bank"), First Services Financial Limited and Brookings Service Corporation, for interim reporting are consistent with the accounting policies followed for annual financial reporting. All adjustments that, in the opinion of management, are necessary for a fair presentation of the results for the periods reported have been included in the accompanying unaudited consolidated financial statements, and all such adjustments are of a normal recurring nature. The accompanying financial statements do not purport to contain all the necessary financial disclosures required by generally accepted accounting principles that might otherwise be necessary in the circumstances and should be read in conjunction with the Company's financial statements, and notes thereto, for the year ended September 30, 1995.

2. SECURITIES

During the year ended September 30, 1995, the Company reclassified all securities, including mortgage-backed securities, previously designated as held-to-maturity to the available-for-sale category. All securities acquired subsequent to this reclassification have also been designated as available-for-sale.

3. EARNINGS PER SHARE

Earnings per share is computed based on the weighted average number of common shares and common stock equivalent shares outstanding during the period, which totaled 1,793,575 and 1,871,481 shares for the three months ended June 30, 1996 and 1995, respectively, and which totaled 1,791,522 and 1,891,192 shares for the nine months ended June 30, 1996 and 1995, respectively. Unallocated shares of common stock held by the employee stock ownership plan are not considered outstanding for the purpose of calculating earnings per share. The difference between primary and fully diluted earnings per share is not material.

4. COMMITMENTS

At June 30, 1996 and September 30, 1995, the Bank had outstanding commitments to originate and purchase loans totaling \$1.8 million and \$6.8 million, respectively, excluding undisbursed portions of loans in process. It is expected that outstanding loan commitments will be funded with existing liquid assets.

5. COMPLETED ACQUISITION

On December 29, 1995, First Midwest completed the acquisition of Iowa Bancorp, Inc. ("Iowa Bancorp"), and its wholly-owned subsidiary, Iowa Savings Bank, a federal savings bank, ("Iowa Savings") located in Des Moines, Iowa. Upon acquisition, Iowa Bancorp was merged into First Midwest and Iowa Savings was merged into First Federal. The Iowa Savings office operates as the Iowa Savings Bank Division of First Federal. At the date of acquisition, Iowa Bancorp had assets of \$24.4 million and total equity of \$7.0 million. First Midwest purchased Iowa Bancorp's 379,980 outstanding shares and 36,537 shares subject to option for a cash payment of \$20.39 per share for a total net purchase price of approximately \$8.0 million. The acquisition has been accounted for as a purchase, and the accompanying consolidated financial statements reflect the combined results since the date of acquisition. The cost of the acquisition will be allocated on the basis of the estimated fair market value of the assets acquired and liabilities assumed. The fair value to be assigned to the assets and liabilities, including the core value of the existing customer deposit base, has not yet been determined.

The unaudited consolidated results of operations on a pro forma basis

as though the acquisition of Iowa Bancorp had been consummated at October 1, 1995 are as follows:

	Nine Months Ended June 30, 1996 -----
	(amounts in thousands except per share data)
Interest income	\$ 18,178
Interest expense	10,348
	-----
Net interest income before provision for loan losses	7,830
Provision for loan losses	191
	-----
Net interest income	7,639
Non-interest income	1,048
Non-interest expense	4,846
	-----
Income before income taxes	3,841
Income tax expense	1,590
	-----
Net Income	\$ 2,251
	=====
Net income per weighted average share outstanding	\$1.26
	=====

The pro forma financial information is presented for informational purposes only and is not necessarily indicative of the operating results that would have occurred had the Iowa Bancorp acquisition been consummated as of the above date, nor are they necessarily indicative of future operating results.

6. PENDING ACQUISITION

On May 20, 1996, the Company entered into a definitive agreement to acquire Central West Bancorporation ("Central West"), the holding company of Security State Bank, Stuart, Iowa. The agreement calls for the Company to acquire all outstanding shares of Central West for an estimated aggregate consideration valued at \$5.3 million, or approximately \$73.00 per share, to be paid 75% in common stock of the Company and 25% in cash, subject to adjustment in accordance with the terms of the agreement. The acquisition, which will be accounted for as a purchase, is subject to approval by the Federal Reserve Board and the Iowa superintendent of banking. The stockholders of Central West have approved the acquisition. The acquisition is expected to be completed by the end of 1996. At June 30, 1996, Central West had assets of \$30.0 million, deposits of \$26.4 million and stockholders' equity of \$2.5 million. Security State Bank operates offices in Stuart, Casey and Menlo, Iowa, which will continue to operate after completion of the acquisition.

7. NEW ACCOUNTING PRONOUNCEMENTS - MORTGAGE SERVICING RIGHTS

In May 1995, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standards Number 122 (SFAS No. 122) entitled Accounting for Mortgage Servicing Rights. SFAS No. 122 requires mortgage servicers that sell or securitize loans and retain servicing rights to allocate the total cost of the loans to the servicing rights and loans based on their fair value if practicable to estimate or, if not practicable to estimate, to the loans only. SFAS No. 122 is effective for fiscal years beginning after December 15, 1995, or October 1, 1996 for the Company. The effect is dependent, among other items, upon the volume and type of loans originated, the general levels of market interest rates, and the rate of estimated loan prepayments. The Company believes the implementation of this statement will not have a significant impact on its financial statements.

Part I. Financial Information

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

FIRST MIDWEST FINANCIAL, INC.  
AND SUBSIDIARIES

GENERAL

First Midwest Financial, Inc. ("First Midwest" or the "Company") was incorporated under the laws of the State of Delaware for the purpose of owning all of the outstanding stock of First Federal Savings Bank of the Midwest ("First Federal" or the "Bank") issued upon the conversion of First Federal from mutual to stock form. First Midwest acquired all of the stock of First Federal on September 20, 1993, when the conversion was consummated. The activities of First Midwest itself have no material impact on the results of operations on a consolidated basis. Unless otherwise indicated, the activities discussed below relate to the activities of First Federal.

The following discussion focuses on the consolidated financial condition of First Midwest and its subsidiaries, at June 30, 1996, compared to September 30, 1995, and the consolidated results of operations for the three months and nine months ended June 30, 1996, compared to the same periods in 1995. This discussion should be read in conjunction with the Company's financial statements, and notes thereto, for the year ended September 30, 1995.

#### FINANCIAL CONDITION

Total assets increased by \$77.9 million, or 29.5%, from \$264.2 million at September 30, 1995, to \$342.1 million at June 30, 1996. The increase is, in part, attributable to the acquisition of Iowa Bancorp during the period (see Note 5 to the Consolidated Financial Statements). At the date of acquisition, Iowa Bancorp had total assets of \$24.4 million, which included loans receivable of \$16.4 million. In addition, the increase in total assets is attributable to the purchase of mortgage-backed securities, increased cash and cash equivalent balances, and an increase in net loan receivables.

Cash and cash equivalents increased \$13.5 million, or 293.4%, to \$18.2 million at June 30, 1996, from \$4.6 million at September 30, 1995. The increase was due primarily to the accumulation of liquid funds from the repayment of loans, from growth in customer deposits and from other sources. The funds are to be used primarily to fund current and anticipated lending opportunities, and to repay short-term borrowings.

The portfolio of securities available-for-sale decreased by \$514,000, or 1.1%, to \$48.3 million at June 30, 1996, from \$48.8 million at September 30, 1995. The decrease is the result of the maturity or call of securities during the period in an amount somewhat in excess of purchases made during the period.

Mortgage-backed securities available-for-sale increased by \$16.4 million, or 76.7%, to \$37.8 million at June 30, 1996, from \$21.4 million at September 30, 1995. The increase was due primarily to the purchase of adjustable-rate government agency issued mortgage-backed securities during the period. In addition, Iowa Bancorp held \$3.2 million in mortgage-backed securities at the date of acquisition.

The net portfolio of loans receivable (consisting of single-family and multi-family residential mortgage loans, commercial real estate, agricultural, consumer and other loans) increased by \$44.2 million, or 24.8%, to \$222.8 million at June 30, 1996, from \$178.6 million at September 30, 1995. The increase in loan receivables includes \$16.4 million held by Iowa Bancorp at the date of acquisition. In addition, the increase reflects increased origination of residential, agricultural, commercial business and consumer loans, and the purchase of multi-family residential and commercial real estate loans during the period.

Deposit balances increased by \$32.1 million, or 18.7%, to \$203.9 million at June 30, 1996, from \$171.8 million at September 30, 1995. The increase in deposits includes \$15.6 million held by Iowa Bancorp at the date of acquisition. In addition, deposit balances increased for checking, savings and certificates of deposit accounts, which was partially offset by a decline in money market accounts during the period.

The balance in advances from the Federal Home Loan Bank of Des Moines increased by \$42.2 million, or 82.6%, to \$93.3 million at June 30, 1996 from \$51.1 million at September 30, 1995. The increase reflects additional borrowings during the period used to fund the origination and purchase of loans, and the purchase of mortgage-backed securities.

Total stockholders' equity increased by \$1.0 million, or 2.7%, to \$39.0 million at June 30, 1996 from \$38.0 million at September 30, 1995. The increase is primarily due to growth in retained earnings during the period, which was offset by a reduction in unrealized gains on securities available-for-sale and was

reduced by the effect of the acquisition of treasury stock during the period.

#### NON-PERFORMING ASSETS AND ALLOWANCE FOR LOAN LOSSES

Non-performing assets at June 30, 1996 totaled \$675,000, which reflects a decrease of \$197,000, or 26.0%, from the \$759,000 balance at September 30, 1995. At June 30, 1996, non-performing assets included three non-accrual mortgage loans with an aggregate outstanding balance of \$143,000, and sixty non-accrual consumer and commercial loans with an aggregate outstanding balance of \$419,000. In addition, non-performing assets at June 30, 1996 included real estate owned and other repossessed assets totaling \$113,000. At September 30, 1995, the Bank held real estate owned totaling \$48,000.

Generally, when a loan becomes delinquent 90 days or more, or when the collection of principal or interest becomes doubtful, the Company will place the loan on non-accrual status and, as a result of this action, previously accrued interest income on the loan is taken out of current income. The loan will remain on non-accrual status as long as the loan is 90 days or more delinquent.

The Bank establishes its provision for possible loan losses, and evaluates the adequacy of its allowance for loan losses based upon a systematic methodology consisting of a number of factors including, among others, historic loss experience, the overall level of non-performing loans, the composition of its loan portfolio and the general economic environment within which the Bank and its borrowers operate. As a result of this analysis, the Bank has established an allowance for loan losses at June 30, 1996, of \$1.81 million. The allowance represents approximately 268.3% of the total non-performing assets at June 30, 1996.

Financial Accounting Standards Board (FASB) Statement No. 114, Accounting by Creditors for Impairment of a Loan, as amended by Standard No. 118, Accounting by Creditors for Impairment of a Loan - Income Recognition and Disclosure, was adopted as of October 1, 1995. Under this statement, loans considered to be impaired are reduced to the present value of expected future cash flows or to the fair value of collateral, by allocating a portion of the allowance for loan losses to such loans. If these allocations cause the allowance for loan losses to require increase, such increase is reported as provision for loan loss expense. The adoption of this statement had no impact on the provision for loan loss expense for the nine month period ended June 30, 1996.

The following table sets forth an analysis of the Company's allowance for loan losses:

	(In Thousands)
Balance, September 30, 1995	\$ 1,650
Iowa Savings Bank allowance at acquisition date	132
Charge-offs	45
Transfers to real estate owned	15
Recoveries	-
Additions charged to operations	90
	-----
Balance, June 30, 1996	\$ 1,812
	=====

Based on currently available information, management believes that the allowance for loan losses is adequate to absorb potential losses in the portfolio. Future additions to the allowance for loan losses may become necessary based upon changing economic conditions, increased loan balances or changes in the underlying collateral of the loan portfolio.

#### RESULTS OF OPERATIONS

General. Net income for the three months ended June 30, 1996 decreased \$370,000, or 29.3%, to \$892,000 from \$1.26 million during the same period in 1995. For the nine months ended June 30, 1996, net income decreased \$417,000, or 14.8%, to \$2.40 million compared to \$2.81 million during the same period in 1995. The decrease in net income for both the three month and nine month periods is primarily due to a gain on sale of securities that increased previous year net income by approximately \$632,000.

Interest Income. Total interest income for the three months ended June 30, 1996 increased by \$1.34 million, or 25.9%, to \$6.50 million, compared to \$5.16

million during the same period in 1995. For the nine months ended June 30, 1996, interest income increased by \$1.90 million, or 11.9%, to \$17.82 million from \$15.92 million during 1995. The increase during both periods is primarily due to increased interest income from the loan portfolio, as a result of higher average portfolio balances during the 1996 periods compared to 1995. In addition, the 1996 three month period reflects interest income on the earning assets resulting from the acquisition of Iowa Savings Bank. These increases in interest income were partially offset by reductions in interest income from the investment securities and mortgage-backed securities portfolios, both of which carried lower average balances during the 1996 periods compared to 1995.

Interest expense. Total interest expense for the three months ended June 30, 1996 increased by \$838,000, or 28.9%, to \$3.74 million from \$2.90 million during the same period in 1995. For the nine months ended June 30, 1996, interest expense increased by \$1.24 million, or 13.9%, to \$10.10 million from \$8.87 million for the same period in 1995. The increase for both periods reflects increased interest expense on higher deposit balances during the 1996 periods compared to 1995, and the higher cost of interest on those deposits resulting from a general increase in the level of interest rates between the comparable periods. The three month period also reflects additional interest expense on interest-bearing liabilities resulting from the acquisition of Iowa Savings Bank.

Net Interest Income. Net interest income increased by \$498,000, or 22.0%, to \$2.73 million for the three months ended June 30, 1996, from \$2.27 million for the same period in 1995. For the nine months ended June 30, 1996, net interest income increased \$666,000, or 9.4%, to \$7.72 million from \$7.06 million for the same period in 1995. The increase in net interest income is due primarily to the overall increase in interest-earning assets between the comparable periods, which resulted, in part, from the acquisition of Iowa Savings Bank and, additionally, as a result of an increase in the loan portfolio.

Provision for Loan Losses. For the three months and nine months ended June 30, 1996, the provision for loan losses was \$30,000 and \$90,000, respectively. For the three months and nine months ended June 30, 1995, the provision for loan losses was \$130,000 and \$190,000, respectively. The comparatively higher provision for loan losses during the previous year resulted from management's election to increase the balance in allowance for loan losses in conjunction with growth of the loan portfolio. Management believes, based on review of historic loan losses, current economic conditions, the level of non-performing loans, and other factors, that the current level of provision for loan losses, and the resulting level in the allowance for loan losses, reflects an adequate reserve against potential losses from the loan portfolio.

Non-Interest Income. Non-interest income decreased by \$993,000, or 73.4%, to \$360,000 for the three months ended June 30, 1996, from \$1.35 million for the same period in 1995. For the nine months ended June 30, 1996, non-interest income decreased \$895,000, or 46.0%, to \$1.05 million from \$1.94 million for the same period in 1995. The decrease during both periods reflects the previous year gain on sale of securities that resulted in an approximate \$1.0 million addition to non-interest income.

Non-Interest Expense. Non-interest expense increased \$240,000, or 17.6%, to \$1.61 million for the three months ended June 30, 1996, from \$1.37 million for the same period in 1995. For the nine months ended June 30, 1996, non-interest expense increased \$528,000, or 12.8%, to \$4.67 million from \$4.14 million for the same period in 1995. The increase in non-interest expense during both periods reflects the operation of an additional office facility, the conversion of data processing systems and the implementation of new product offerings associated with the acquisition of the Iowa Savings Bank Division. In addition, the increase reflects professional and consulting expenses incurred in conjunction with special projects during the period.

Federal law requires that the FDIC maintain reserves at both the Savings Association Insurance Fund ("SAIF") and the Bank Insurance Fund ("BIF") of at least 1.25% of insured depositor accounts. The reserves are funded through the payment of insurance premiums by the insured institution members of each fund. The BIF reached this level during 1995, and the FDIC reduced insurance premiums applicable to BIF-insured institutions while retaining the premiums applicable to SAIF members, such as First Federal, at their current level of .23% of deposits until the SAIF reaches its required reserve level. Proposed federal legislation provides for a one-time assessment of .65% to .75% of insured deposits to be imposed on all SAIF-insured deposits, including those held by commercial banks, and for BIF deposit insurance premiums to be used to pay the Financing Corporation ("FICO") bond interest on a pro rata basis together with

SAIF premiums. If a requirement were implemented as of June 30, 1996 for the Bank to pay a one-time assessment equal to .75% of insured deposits, the amount of such assessment would be approximately \$1.5 million, although it would also be anticipated that future SAIF premiums would be significantly lower than the current level.

Income Tax Expense. Income tax expense decreased \$266,000, or 30.9%, to \$594,000 for the three months ended June 30, 1996, from \$859,000 for the same period in 1995. For the nine months ended June 30, 1996, income tax expense decreased \$240,000, or 12.9%, to \$1.62 million from \$1.86 million for the comparable period in 1995. The decrease for the comparable three month and nine month periods is due to a reduction in the level of taxable income.

LIQUIDITY AND CAPITAL RESOURCES

The Bank's primary sources of funds are deposits, principal and interest payments on loans, investments and mortgage-backed securities, and funds provided by operations. While scheduled payments on loans, mortgage-backed securities and short-term investments are relatively predictable sources of funds, deposit flows are greatly influenced by general interest rates, economic conditions and competition.

The Bank's primary regulator, the Office of Thrift Supervision, requires the Bank to maintain a minimum level of investments in specified types of liquid assets. Current regulations require the Bank to maintain an average daily balance in cash and eligible investments in an amount equal to at least 5% of net withdrawable deposit accounts and short-term borrowings. At June 30, 1996 and September 30, 1995, the Bank's liquidity ratios were 6.3% and 10.8%, respectively, which were in excess of the minimum regulatory requirements.

The Bank uses its capital resources principally to meet ongoing commitments to fund maturing certificates of deposits and loan commitments, to maintain liquidity and to meet operating expenses. At June 30, 1996, the Bank had commitments to originate and purchase loans totalling \$1.8 million. The Bank considers its liquidity and capital resources to be adequate to meet its foreseeable short- and long-term needs. Savings institutions insured by the Federal Deposit Insurance Corporation are required by federal law to meet three regulatory capital requirements. The following table sets forth the Bank's regulatory capital levels at June 30, 1996, which, at that date substantially exceeded all regulatory requirements:

(Dollars in Thousands)	June 30, 1996					
	Tangible Capital		Core Capital		Risk-Based Capital	
	Amount	%	Amount	%	Amount	%
Actual	\$30,650	9.2	\$30,650	9.2	\$32,413	16.1
Required	5,010	1.5	10,020	3.0	16,120	8.0
Excess	\$25,640	7.7	\$20,630	6.2	\$16,293	8.1

The Federal Deposit Insurance Corporation Improvement Act of 1991 (FDICIA) established five regulatory capital categories and authorized the banking regulators to take prompt corrective action with respect to institutions in an undercapitalized category. At June 30, 1996, the Bank exceeded minimum requirements for the well-capitalized category.
